MEDICAL STAFF

Introductory Statement

The Fiscal Year 1962 budget estimate provides for the continuation of the basic medical services of clinical medicine, psychiatric service, operational activities and administrative support. In addition, provision is made in the clinical program for the development of more detailed diagnostic services. These services are required in order to extend the Dependent Examination Program to returnee dependents; and to enhance diagnostic capabilities as necessary to meet the increasing clinical demands resulting from aging factors in the Agency population.

NARRATIVE JUSTIFICATION (Cont'd)

Medical Services (Cont'd)

Accomplishments Fiscal Year 1960: (Cont'd)

The following workload statistics on medical services in Fiscal Year 1960 are significant:

25X1A

Objectives Fiscal Years 1961 and 1962:

To enhance the quality of medical service by means of the introduction of more precise diagnostic techniques required by an increase in morbidity; this increased morbidity is naturally and inevitably proportionate to the maturing of Agency personnel. Radioactive isotopes and electronic devices are but two of the advanced diagnostic techniques contemplated.

To implement in early Fiscal Year 1961 the program for the medical evaluation of dependent returnees. This is the counterpart of the program for the evaluation of dependents proceeding with employees to overseas areas which was initiated in April 1958.
